

# Roof Truss

**is an engineered product**

**Why risk your project by specifying poorly engineered products?**

- ✓ Poorly engineered trusses can cause *leakage*
- ✓ Poorly engineered trusses can sag and affect the *appearance* of the building
- ✓ Poorly engineered trusses are *dangerous* to the occupants of the building
- ✓ Poorly engineered trusses are *expensive* in the long term due to maintenance
- ✓ Poorly engineered trusses affect the *reputation* of the professionals that specify the products

“Pryda provides you with an engineered truss system and we can assist you to avoid all the problems related to poorly engineered trusses”
